Inspect and activate your emergency washing facilities.

You must:

Make sure all plumbed emergency washing facilities are inspected once a year to make sure they function correctly

You must:

- Make sure plumbed emergency eyewashes and hand-held drench hoses are activated weekly to check the proper functioning of the valves, hardware, and availability of water
- Make sure all self-contained eyewash equipment and personal eyewash units are inspected and maintained according to manufacturer instructions.
- Preventative Maintenance Inspections to check proper operation must be done once a year
- Sealed personal eyewashes must be replaced after the manufacturer's expiration date.
