This course is designed for specialists, dentists, dental hygienists and dental assistants.

This all-day course will cover lesions in nine categories that have benign-looking clinical presentations when, in actuality, most carry a serious or frank malignant diagnosis. The course will cover: soft tissue and bone lesions including diseases of the surface epithelium, focusing on early detection of cancer; gingival swellings in adults and children; palatal swellings, focusing on salivary gland pathology; oral ulcers, focusing on immune mediated diseases but also covering the oral manifestation of gastrointestinal diseases; brown spot(s), focusing on drug-induced and oral malignant melanoma; multiple papillary lesions, focusing on oral HPV-associated diseases, including oral cancer; unilocular radiolucencies, focusing on aggressive oral cysts and cancer metastasis; multicellular radiolucencies, focusing on aggressive odontogenic neoplasms, completely radiopaque lesions (single and multiple), and the latter's association with Gardner's syndrome. Every category will start with a clinical case which will be discussed interactively, seeking a differential diagnosis from the audience. The case will serve as the basis for an in-depth discussion of the differential diagnosis, clinical presentation, and final diagnosis based on the histology. Treatment at every level, recurrence rate, and overall prognosis will also be discussed. Clinicians will leave this program with ample knowledge to use when deciding whether or not a certain presentation is truly benign. They will be provided with tools to base their judgment on facts, not uncertain conjecture. This is an enthusiastic, energetic course. It will provide necessary information directly applicable to improving the everyday practice of diagnosing oral diseases.

Course Objectives - As a result of attending this course, you will be able to:

- Be proficient in the diseases of HPV and oral cancer.
- Recognize the effects of e-cigarettes and hookah on oral health.
- Implement radiolucent and radiopaque lesions of the jaw.

INSTRUCTOR
DOLPHINE ODA is Professor of Oral Pathology in the Department of Oral and Maxillofacial Surgery at the School of Dentistry, University of Washington, and the Director of the UW's Oral Pathology Biopsy Service.

LOCATION
University of Washington
Kane Hall, Room 110
Seattle, WA 98195

TIMES
Registration and Continental Breakfast: 8:00am – 8:30am
Course: 8:30am – 4:30pm

$279/Dentist
$179/Staff
$251/Current Dental Alumni Member

CREDITS
7 hours

* This course is eligible for a 10% discount if you are a current member of the UW Dental Alumni Association.
The University of Washington gratefully acknowledges Henry Schein for its generous educational grant in support of this program.

This course is designed for everyone who works in a dental office – bring the whole team! It provides the information necessary to complete the annual training requirement for your entire dental team.

WISHA-OSHA requires employers to provide annual training for all of their employees. Compliance with WISHA-OSHA regulations and CDC Infection Control Guidelines is also an integral part of a dental practice's overall risk management program. OSHA inspections do occur and many state dental boards are enforcing CDC Guidelines as the benchmark for infection control standard of care.

This comprehensive class will update your office on the current requirements that apply to a dental practice and provide you with the knowledge to establish a properly customized OSHA safety compliance program and infection control policies and practices for your office.

Dr. Barry offers an informative class that is both interesting and engaging with examples of actual safety related events. Materials, devices, monitoring, and documents necessary for compliance will be identified throughout the class. Training will primarily focus on the OSHA regulations with an in-depth review of the CDC Guidelines for Infection Control in the Dental Healthcare Setting. Several other important regulatory rules and guidelines will also be discussed.

Course Objectives - As a result of attending this course, you will understand:

- All the WISHA/OSHA standards that apply to dentistry and how to implement them.
- The Blood borne Pathogen Standard requirements including, transmission of disease, exposure control methods, hepatitis B vaccine, post exposure protocols, and record keeping.
- The CDC Guidelines for Infection Control in the Dental Healthcare Setting and the essentials of the CDC standard precautions

INSTRUCTOR
SAMUEL BARRY received his dental degree from Oregon Health Sciences University School of Dentistry and then maintained a private general dental practice for 15 years. He is currently a Field Sales Consultant with Henry Schein Dental, based in Pendleton, Oregon. In 2006 he was certified as an OSHA Trainer and has presented over 200 classes on WISHA/OSHA Compliance, Bloodborne Pathogens, and Infection Control. His class is recommended by both NORDIC and DBIC Insurance Companies as an important component of overall risk management. Dr. Barry is a noted speaker and receives high praise for his classes.

* This course is eligible for a 10% tuition discount if you are a member of the UW Dental Alumni Association.
This course is designed for specialists, dentists, dental hygienists and dental assistants.

Have you ever had to face the prospect of treating a medically-complex patient? Have you ever had a patient needing treatment for a dental emergency that has more than one underlying chronic disease or is on more than five medications? Now what if these same patients are also experimenting with illicit drugs? How does the use of marijuana, cocaine, methamphetamine, crack, Salvia divinorum, khat bush, or designer drugs such as MDPV change your treatment plan?

Drug abuse remains a major problem in our society. According to the National Survey on Drug Use and Health conducted by SAMSHA (Substance Abuse and Mental Health Services Administration), between 2012 and 2014 an estimated 4.3 million (4.7%) adults aged 50 or older had used an illicit drug in the previous year. Moreover, the organization’s combined data from 2005 to 2014 showed that over 8.3 million children (11.9%) lived with at least one parent who was dependent on or abused alcohol or an illicit drug during the past year. Among that population almost 2.1 million (3.0%) lived with a parent who was dependent on or abused illicit drugs.

If substance abuse and dependence affects one in ten North Americans, this means one in ten of your patients. With the approval of both medical and recreational marijuana in the Evergreen state, the number of users who now present to the dental office is rapidly escalating.

This program looks at some of these most challenging patients, their most common negative oral health sequelae due to marijuana use and the management of these patients with a particular focus on the dental realm. Case studies will augment the delivery of key points and a problem-based learning approach is encouraged so that each participant’s questions are addressed. Most importantly, you will learn applicable strategies to successfully treat these complex patients on Monday morning.

Course Objectives - As a result of attending this course, you will be able to:

- Describe the risk factors to consider when treating patients who use marijuana.
- Understand the medical evidence behind the safety and efficacy of cannabis.
- Recognize some of the oral signs of marijuana use and how to better manage these patients.

INSTRUCTOR
MARK DONALDSON received his Doctorate in Clinical Pharmacy from the University of Washington. He is the current Director of Clinical Pharmacy Performance Services for VHA, living in Whitefish, Montana.

LOCATION
University of Washington
Health Sciences Center, Room D-209
Seattle, Washington 98195

TIMES

Course: 6:30pm – 8:30pm

TUITION – price includes lite supper
Until October 4, 2016 (after, $10 more)
$75/Dentist
$45/Staff
$67/Current Dental Alumni Member

CREDITS
2 hours

* This course is eligible for a 10% tuition discount if you are a member of the UW Dental Alumni Association.
This course is offered in partnership with the Seattle King and Pierce County Dental Societies.

The development of new materials has proceeded so rapidly that many clinicians are left confused by the wealth of new products that are available in many areas. This course will present the latest information available on current dentin/enamel adhesives, composite resins, and light-curing technology. It also will cover contemporary cements, a confusing area that is important to the success of our routine indirect restorations and esthetic cases. Information provided will be based on scientific evidence, but the clinical use of all materials will be emphasized.

Course Objectives - As a result of attending this course, you will be able to:
- Know the four current strategies for bonding to tooth structure, including the self-etch and universal systems.
- Explain the benefits of contemporary nanofill and bulk-fill composite materials.
- Know the various types of cements for indirect restorations, and when they should be used.

INSTRUCTOR
ED SWIFT received his dental degree from the Medical University of South Carolina and a master’s degree in Operative Dentistry from the University of Iowa. Dr. Swift practiced general dentistry for several years, and has taught at the University of Mississippi and the University of Iowa. He is currently the Associate Dean for Education at the University of North Carolina School of Dentistry, Chapel Hill, North Carolina.

LOCATION
Emerald Queen Conference Center
5700 Pacific Highway E.
Fife, WA 98424

$175/Retired Dentist, Dental Hygienist, Dental Assistant and Office Staff
* There are no additional discounts for this program.

CREDITS
7 hours
This course is designed for dentists, hygienists and dental assistants.

Did you know that more than 20% of hospital admissions are due to adverse drug reactions? Although dentists prescribe less than 10% of all available drugs, your patients may be taking many others from the 90% with which you may not be familiar. Since polypharmacy is the norm, especially in the over 65-year old population, this course is essential to every practice setting today.

Do you have patients who are already on one prescription medication before they come to your office? How about four prescription medications? Did you know that the likelihood of a drug interaction in a patient on five medications is greater than 50%? What if you are the prescriber who writes the fifth prescription? With so many new medications, herbal products, over-the-counter drugs, and supplements available on the market, how can you be confident that the prescription you write is compatible with what your patient is currently taking?

This interactive program looks at some of the more common drugs and drug interactions and their management with a particular focus on the dental realm. Case studies will augment the delivery of key points and a problem-based learning approach is encouraged so that each participant’s questions are addressed. After all, when an adverse drug reaction occurs due to a drug interaction, who is more at risk – you or your patient?

This course will also provide updates on antibiotic selection and therapy, pain and anxiety control, the State Prescription Drug Database, Osteonecrosis of the Jaw with bisphosphonates and much more!

Course Objectives - As a result of attending this course you will be able to:

- Describe the most effective “recipe” for post-operative pain control.
- Understand appropriate antibiotic prescribing and current guidelines for prophylaxis (especially for cardiac and orthopedic patients).
- Keep your patients safe with improved prescribing practices.

INSTRUCTOR
MARK DONALDSON received his baccalaureate degree from the University of British Columbia, and his Doctorate in Clinical Pharmacy from the University of Washington. He has further completed a residency at Canada’s largest tertiary care facility, Vancouver General Hospital, and is the current Director of Clinical Pharmacy Performance Services for VHA, living in Whitefish, Montana.

* This course is eligible for a 10% tuition discount if you are a current member of the UW Dental Alumni Association.
The University of Washington gratefully acknowledges the Washington Dental Service Foundation for its generous educational grant in support of this program.

This course is designed for dentists.

With the baby boom generation reaching 65 years and beyond, this is the first generation of Americans to reach older adulthood with an almost intact natural dentition. While keeping our teeth as we age is a positive trend, increasing lifespans can also result in the onset of chronic conditions, long-term medication usage, and oral diseases that can create complex dental treatment needs and questions on the part of dental professionals on how to care for this population.

Most dentists today received very little formal training in caring for the unique needs of older patients. WDS Foundation engaged a team of national experts in serving older adults, led by Dr. Linda Niessen, DMD, MPH, to develop a course that discusses the importance of treating the oral health needs of independently-living older adults in your office. This course is targeted to general dentists to expand their expertise in delivering optimal dental care to this diverse, and growing, senior population who needs care. The course will include patient cases and discussion to assess treatment options based on the patient’s goals, ability to pay, health status, etc. The course is designed to build confidence in treating older patients, understand patient care options, and increase access to dental care for older adults.

Course Objectives - As a result of completing this course you will be able to:

- Enhance understanding in managing the interactions between oral conditions and overall health and the importance of prevention at every age and stage of health.
- Provide clinical tips associated with senior’s common clinical needs, such as root caries, endodontics, oral surgery, and implants.
- Gain practical insights on serving more seniors in your office—practice management, scheduling, billing, and other topics.

INSTRUCTORS
O. ROSS BEIRNE is Professor of Oral and Maxillofacial Surgery at the University of Washington, School of Dentistry and Chief of Hospital Dentistry at the University of Washington Medical Center.
BEA GANDARA is a Clinical Associate Professor in the Department of Oral Medicine at the UW School of Dentistry.
KURT LABBERTON is a general dentist practicing in Yakima, Washington and is a graduate of the University of Washington School of Dentistry.
ROD WENTWORTH practices general dentistry in Bellevue, Washington and is a graduate of the University of Washington School of Dentistry.

LOCATION
Davenport Grand Hotel
333 W. Spokane Falls Blvd.
Spokane, Washington 99201

TIMES
Registration and Continental Breakfast: 8:00am – 8:30am
Course: 8:30am – 4:30pm

TUITION – includes lunch
Thanks to the educational grant provided by the Washington Dental Service Foundation, this course is offered free of charge.

LIMITED ATTENDANCE
This course is limited to 45 participants. Due to the limited attendance at this course, please let us know as soon as possible if your plans change and you are no longer able to attend the course.

CREDITS
7 hours
This course is designed for dentists, dental hygienists and dental assistants.

It is time to do more than just clean teeth. It is time to make the recall visit less of a beauty visit and more of a health visit. Screening your patients for the systemic diseases that can be affected by oral inflammation is the new standard of care in dentistry. This course gives you the knowledge and materials to develop a new approach to the periodontal portion of your practice.

Established links between oral and systemic diseases mean that today’s dentist and hygienist can play a vital role in helping patients improve their oral and overall health. Co-management of the diseases that dentistry has in common with medicine is the next big thing! This course presents the science, the medical knowledge and the communication skills necessary to better manage your patients’ oral and overall health.

A clear strategy for marketing the new message of dentistry is presented in a way that will allow you to better help your practice and your patients. You will learn how to expand the services you provide to your patients. Most importantly, you will gain the confidence to co-manage cardiovascular disease, diabetes, rheumatoid arthritis, sleep apnea, obesity, nutrition, etc. This is a fast-paced learn-it-today-use-it-tomorrow seminar which is supplemented with practice management materials which makes managing patient’s oral and overall information easy and efficient.

**Course Objectives – As a result of attending this course you will be able to:**

- Fully understand the inflammatory link between oral and overall health.
- Master the medicine knowledge necessary to collaborate with medical colleagues.
- Learn which lab test to order for patients and how to interpret the results.
- Develop a practice management protocol to use the oral/systemic link to increase case acceptance and referrals.

**INSTRUCTOR**

TIMOTHY DONLEY is currently in the private practice of Periodontics and Implantology in Bowling Green, Kentucky. After graduating from the University of Notre Dame, Georgetown University School of Dentistry and completing a general practice residency, he practiced general dentistry. He then returned to Indiana University where he received his Master’s Degree in Periodontics.

** This course is eligible for an “Early Bird Discount” if you register six weeks or more before the course.
This course is designed for dental hygienists; however, dentists will also find the information useful.

Morning Lecture: Finally! Demystifying Periodontal Debridement: Exactly what to use and how to use it.

Today’s periodontics is about a lot more than removing what you can see or feel. Come learn the most efficient way to successfully interrupt microscopic biofilm, microscopic calculus and clinically detectable calculus! Hand vs ultrasonic, piezo vs magnetostrictive, subgingival airpolishing…we will use the latest evidence to answer all of your questions. Attendees will leave with a clear protocol for achieving consistently better periodontal outcomes. This course will complement, but is not a pre-requisite for attending, the hands-on course.

Afternoon Workshop: Hands-on Master Course in Periodontal Debridement

Become a master clinician in 3 hours! Today’s choices include Piezo, Magnetostrictive, Hand Instrumentation and Subgingival Air Polishing. This is a fast-paced clinically oriented course in which participants rotate through stations to objectively learn the strengths and weaknesses of each method. You will also learn the tips and tricks to make whatever you are using more effective and efficient.

Participants leave with a renewed confidence and ability to maximize the result of periodontal therapy for their patients. Dr. Donley literally wrote the book on ultrasonic debridement. This course presents evidence-based protocols to maximize chances for resolving patients’ periodontal disease. Hands on training is intended to allow the attendee to develop maximum confidence in their debridement skills.

Course Objectives – As a result of attending this class you will be able to:

- Demonstrate the advantages and disadvantages of hand vs. ultrasonic instrumentation.
- Discuss the differences between ultrasonic units from various manufacturers.

INSTRUCTOR

TIMOTHY DONLEY is currently in the private practice of Periodontics and Implantology in Bowling Green, Kentucky.

LOCATION

University of Washington
Health Sciences Center, morning: Room T-435;
afternoon: Room D-165
Seattle, WA 98195

TIMES

Course: 8:30am – 12:30pm

TUITION - price includes lunch if attending whole day
Early Bird until September 17, 2016
$288.10/Dentist whole day
$200.10/Staff whole day
$279.19/Current Dental Alumni Member whole day

Until October 27, 2016 (after, $25 more)
$298/Dentist whole day
$208/Staff whole day
$288.10/Current Dental Alumni Member whole day

CREDITS

3 hours lecture; 4 hours workshop

LIMITED ATTENDANCE

Hands-on portion of this course is limited to 40 participants.

* Half-day pricing option available. See website for details.
This course is designed for dentists, dental hygienists, dental assistants, and office staff.

- Are you ready to increase case acceptance and cash flow and decrease the “bumps” in your day?
- Are you ready to get the entire team motivated and on the same page?
- Are you ready to actually implement the necessary protocols to realize YOUR dream practice?

This inspiring and powerful presentation has galvanized dental practices around the world. Drawing from 30+ years of increased growth and profitability, Dr. Rasner shares the protocols and foundations that can elevate any dental practice to extraordinary levels of success.

Includes: Practice management strategies for increased productivity and profitability and decreased drama. Use it on Monday clinical gems that range from enhancing your soft tissue esthetics to dramatically improving your anesthetic technique. Leadership principles that have kept his staff of 16 together for an average of 16 years... without going broke! The psychology of winning: The mental toughness we all need to bounce back from that “bad week”. Lastly, where balance fits into the dynamic of success. How the super achiever can give back to the world and not miss out on the most important part of the journey: family, friends and a full life.

**Course Topics - As a result of attending this course you will understand:**

- The Fail-Proof Blueprint for the stagnant practice
- Four simple principles for 90% case acceptance
- The art of getting paid up front
- Real world ways to reduce overhead
- Protocols: what they are and why you’ll never grow without them
- The weakest link to your profitability
- How to solve any problem in your day in the fewest possible steps
- How to keep staff with you for many years without going broke
- Why most practices waste marketing dollars chasing the wrong market and more…

**INSTRUCTOR**

STEVEN RASNER graduated from the University of Pennsylvania with a doctorate in dental medicine. He received his Mastership from the Academy of General Dentistry. Dr. Rasner is a member of the American Dentistry Association, Academy of Periodontology, Academy of General Dentistry, American College of Implantology, International Congress of Oral Implantologists, and the International Academy for Facial Esthetics. Dr. Rasner practices dentistry in Bridgeton and Vineland, New Jersey.

**LOCATION**

Embassy Suites Hotel
3225 158th Ave SE
Bellevue, WA 98008

**TUITION – price includes lunch:**

- Early Bird until October 7, 2016
  - Dentist: $251.10
  - Dental Hygienist, Dental Assistant and Office Staff: $161.10
  - Current Dental Alumni Member: $225.90

- Until November 16, 2016 (after, $25 more)
  - Dentist: $279
  - Dental Hygienist, Dental Assistant and Office Staff: $179
  - Current Dental Alumni Member: $251

**CREDITS**

- 7 hours

* This course is eligible for a 10% tuition discount if you are a current member of the UW Dental Alumni Association.
** This course is eligible for an “Early Bird Discount” if you register at least six weeks before the course.
This course is designed for specialists, dentists, hygienists and dental assistants.

Morning Topic: CBCT for the General Dental Professional
Cone beam CT (CBCT) has gained more and more field in the last decade, while most of us have never been trained to use the technology or interpret the images acquired from it. This course will first explain what the differences are between CBCT and the more common two dimensional imaging techniques (intraoral and extraoral radiography) in dentistry. Secondly the radiation doses associated with CBCT will be discussed as well as how to influence the dose (kV, mA, exposure time, field of view) and the image quality (high versus low resolution). Last but not least, the indications, contra-indications, advantages and disadvantages of CBCT will be highlighted and illustrated with examples from the clinic. Examples will be shown using software programs from different manufacturers too.

Afternoon Topic: Restorative Update
Selected members of the UW Department of Restorative Dentistry will review three highly relevant topics in restorative dentistry. Dr. Ricardo Schwedhelm will examine various complications associated with implant therapy and then outline associated solutions. This will be followed by Dr. Yen Wei Chen’s discussion of digital dentistry with particular emphasis on its relevance in clinical practice. Dr. Jae Kim will finish with a method to simplify treatment planning to produce ultimate esthetic outcomes.

Course Objectives - As a result of attending both topics you will be able to:
■ Put the radiation doses in dentistry in perspective and use this information when asked by their patients.
■ Refer correctly for CBCT.
■ Diagnose, treat, and ultimately prevent complications related to implant therapy.
■ Develop confidences in the relevance and usefulness of digital dentistry.
■ Understand how tooth position, proportion, and progression effect esthetic outcomes.

INSTRUCTORS
JOHAN APS is full time faculty at the University of Washington, where he currently is in charge of the division of Oral and Maxillofacial Radiology. He also runs ORIS (Oral Radiology Interpretation Service), a UW service.

E. RICARDO SCHWEDHELM is a Clinical Associate Professor in the Department of Restorative Dentistry at the UW School of Dentistry.

YEN-WEI CHEN is an Assistant Professor in the Department of Restorative Dentistry at the UW School of Dentistry.

JAE SEON KIM received his DDS degree from Yonsei University College of Dentistry in Seoul, Korea, and his MSD degree and certificate in Prosthodontics from the University of Washington School of Dentistry.

CANCELLATION AND REFUND POLICIES

LECTURE COURSES
You must inform the CDE office if you cancel a course by the day before the course. If you do not cancel by the day before the course, you will be considered a “No Show”.

For cancellations:
You have two options if you cancel. You can receive a full refund minus a $40 processing fee, plus a $10 fee for each “additional applicant”, or the full amount can be transferred to another CDE course (or courses depending on the amount of the funds transferred) within the same CDE calendar year (September – June). Tuition credit from previous years can not be applied to courses in the current year. The funds can only be transferred once.

For No Shows:
No refund or funds transfer is available.

PARTICIPATION COURSES
Refunds for CDE participation courses must be requested at least fourteen days prior to the first meeting of a course. All participation courses have a $100 non-refundable deposit. The deposit is necessary to cover materials that are incurred which are non-refundable to our office. If a cancellation is made less than fourteen days before a course, no monetary refund will be given, and the money can not be transferred to another course, unless the CDE office is able to occupy the spot with another participant. Funds, minus the $100 non-refundable deposit, may be transferred to another course within the same CDE calendar year if the request is made 14 days before the course.

TRANSFERRING FUNDS TO ANOTHER PARTICIPANT
Before the day of the course, if a registrant wishes to transfer his or her funds to another participant, he or she may do so; however, there is a $10 transfer fee and the CDE office must be made aware of this transfer by the day before the course.

REFUND EXCEPTIONS
No refund penalty will be charged for last-minute emergencies; however, the CDE office must be contacted by noon on the date of the course to notify them of an emergency case by telephone or email. Either a full refund will be given or the money can be transferred towards another CDE course within the same CDE calendar year (September – June).

ACTS OF NATURE
In the event of snow, earthquake or other act of nature, check the CDE website – www.uwcde.com – or please call the CDE office and listen to the instructions placed on the voicemail.

IF A COURSE IS CANCELLED BY CDE
A full refund will be given to all participants.

*The CDE office accepts no responsibility for travel expenses or penalties incurred by course registrants in the event that a course is cancelled or revised.

PARTNERSHIP PROGRAMS
Cancellation policies of programs presented in partnership with other organizations may vary. Please see specific course information for details.
