This course is designed for dentists, but staff are welcome to attend.

(MORNING SESSION) Immediate Extraction Socket Management In the Esthetic Zone & Molars, “What we know, what we think we know, and what we don’t know about”

Immediate placements of implants into extraction sockets is an exciting treatment alternative for our patients. However, there are many potential short and particularly long term risks which the practitioner must be fully aware of. This presentation will focus on the potential problems and benefits both clinically and biologically when the choice of immediate socket placement is made for single and multiple sites. This will be an evidence based presentation that will be objective about the best and simplest way to treat these types of cases.

(AFTERNOON SESSION) Interdisciplinary Approach for Treating the Esthetically Compromised Patient

The treatment planning of complex cases requires the highest level of knowledge and skill of the treating team. It is an orchestration of procedures including proper sequencing and timing that makes the difference. An envisionment of the final case before starting is required to know where the goal of treatment will be directed. This, in conjunction with the patients needs and clinical situation comprise the decision-making process for what is the best treatment for the patient.

INSTRUCTOR
DENNIS TARNOW is currently Clinical Professor of Periodontology and Director of Implant Education at Columbia School of Dental Medicine. He is the former Professor and Chairman of the Department of Periodontology and Implant Dentistry at New York University College of Dentistry. Dr. Tarnow has a private practice in New York City.

LOCATION
Rainier Golf & Country Club
11133 Des Moines Memorial Dr S
Seattle, Washington 98168-1708

TIMES
Registration and Continental Breakfast: 7:30am-8:00am
Course: 8:00am-4:30pm

TUITION
price includes lunch
$595/AGD Member Dentist
$795/Non-AGD Member Dentist
– note – use special code UWCDE to receive $100 off for Non-AGD Member Dentists!
$299/Staff with AGD Dentist
$399/Staff with Non-AGD Dentist

CREDITS
8 hours

CANCELLATION POLICY
Due to the High Demand of this course – There will be no refunds if cancelled 14 days or less prior to the event date

Register for this course through WAGD – see link on course page at www.uwcde.com or call (206)212-4969.
This course is designed for dentists, hygienists, dental assistants and office staff. This course meets the requirements for Washington State's 3-hour opioid training requirement for dentists who prescribe opioids.

This one-day lecture is designed to illustrate how uniting the medical, dental, and pharmaceutical fields ultimately leads to “Better Medicine, Better Dentistry.”

Wouldn’t it be nice to go to a continuing education program that gives you the tools to be more successful starting on Monday morning? Wouldn’t it be great to be known as the dentist who has excellent pain-free, post-operative care without the use of narcotics? Wouldn’t you like to be more confident in all of your prescription writing, knowing that you are on the cutting edge, that you are evidence-based and that you are guideline-driven? This is that program.

The focus of this day will be the latest in pain control and anxiety management. Topics to be covered include: Patient Assessment, Monitoring, and Equipment; Oral Sedatives; Sedation Solutions for Medically-Complex Patients; Proven Strategies for Successful Analgesia and Pain Control; Antibiotic Update and Prescribing Tips; and much more!

Providing dental care to anxious and fearful patients continues to be a major challenge facing dentists. State dental boards change and develop new regulations outlining the training and equipment needed for in-office sedation. Dr. Donaldson will cover both the science and art of pain control and anxiety management in an interactive and engaging multimedia presentation, delivering strategies dentists and their team members can implement in the office on Monday morning.

Course Objectives — As a result of attending this course, you will know:
• Discuss the principles of pharmacokinetics and pharmacodynamics
• Learn how to match the right drug at the right dose to the right patient
• Describe the characteristics of the ideal sedatives for in-office use and give examples

INSTRUCTOR
MARK DONALDSON is the Associate Principal of Clinical Pharmacy for Vizient’s Advisory Solutions, and lives in Whitefish, Montana.

AN INTRODUCTION TO MYOFUNCTIONAL THERAPY, DENTISTRY AND AIRWAY HEALTH

Sarah Hornsby, RDH, BS

Friday, October 4, 2019

TIMES
Registration and Continental Breakfast: 8:00am – 8:30am
Course: 8:30am – 4:30pm
TUITION price includes lunch
 UNTIL SEPTEMBER 30, 2019 (after, $25 more)
$250/Dentist
$150/non-ADHA member hygienists or staff
$125/ADHA members

CREDITS
7 hours

Please register for this course through WDHA at www.wsdha.com.

This course is offered in partnership with Washington Dental Hygienists’ Association.

This course is designed for dentists, hygienists and dental assistants.

This is a one-day course designed to give dental professionals an overview of the field of Orofacial Myofunctional Therapy and its connection to dentistry and airway health.

Course Topics covered will include:
• Symptom identification of Orofacial Myofunctional Disorders (OMDs)
• The importance of the multidisciplinary team in treating OMDs
• An in-depth look at the health consequences of mouth breathing and poor oral posture
• How OMDs affect craniofacial and dental development in children
• The role of Ankyloglossia in dentistry and overall health
• How OMDs and sleep disordered breathing intersect
• The influence of OMDs on temporomandibular joint health and function
• Orthodontic and periodontal health and stability and OMDs

By the end of this course, participants will have a broader understanding of the connection between Orofacial Myofunctional Therapy and dentistry.

They will also understand the role of the hygienist in myofunctional assessment and referral, along with the importance of airway health and functional breathing for children and adults. Myofunctional therapy can be an effective adjunct to dentistry in two ways. First, to guide craniofacial growth and development in children in order to prevent bigger dental and health problems as adults. Second, as part of the process for treating sleep disordered breathing, malocclusion, and TMD in adults in order to address the root cause of their conditions.

INSTRUCTORS
SARAH HORNESBY graduated with a bachelor’s degree in dental hygiene from Eastern Washington University in 2008. She began training in the field of Orofacial Myofunctional Therapy in early 2010, and since then has been teaching and working with patients and dental providers to spread the message about this critical component of the dental health and overall wellness equation.

ORAL PATHOLOGY BOOTCAMP WITH SURGICAL CONSIDERATIONS

Dolphine Oda, BDS, MS and Libby Kutcipal, DDS

Friday, October 18, 2019

This course is designed for specialists, dentists, dental hygienists and dental assistants.

This course is taught by two experienced clinicians: Dr. Kutcipal, an oral surgeon who is an expert on treatment and patient management; the second, Dr. Oda, an oral pathologist who is an expert on diagnosis of oral diseases. Their combined experience results in a course that discusses the full spectrum of the diagnoses, treatment and post-treatment of oral diseases afflicting the adult population.

This course will cover the most important and common oral diseases, as well as some uncommon but problematic conditions, of soft tissue and bone. The main topics of the course include:
• diseases of the surface epithelium, focusing on early detection of oral cancer; single oral swellings such as gingival and palatal swellings, focusing on salivary gland pathology; pigmented lesions of the mouth; and infections such as candidiasis, and HPV. Immune-mediated diseases will also be covered, as well as other conditions that may cause generalized oral ulceration and sloughing. Please see the course website for the complete list of lesions, syndromes, neoplasms, etc., to be covered.

Every topic will start with a clinical case with a differential diagnosis to be discussed interactively, seeking the most likely diagnosis from the audience. Each case will serve as the basis for an in-depth discussion of the differential diagnosis, clinical presentation, and final diagnosis based on the histology. Treatment will be discussed as well as post-treatment concerns such as recurrence rate and overall prognosis. The audience will be provided with tools to base their judgment on facts and up-to-date standard of care. This is an enthusiastic, energetic course. It will provide necessary information directly applicable to improving the everyday practice of diagnosing oral diseases.

Course Objectives - At the conclusion of the course the participant should be able to:
• Identify which lesions need to be biopsied and which do not
• Recognize oral SCC at its earliest stages
• Formulate an applied differential diagnosis for each specific disease

INSTRUCTORS
LIBBY KUTCIPAL is an oral and maxillofacial surgeon in Ballard. She completed dental school at the University of Michigan and her OMFS training at the University of Washington.
DOLPHINE ODA is Professor of Oral Pathology in the Department of Oral and Maxillofacial Surgery at the School of Dentistry, University of Washington, and the director of the UW’s Oral Pathology Biopsy Service.

* This course is eligible for a 10% tuition discount if you are a current member of the UW Dental Alumni Association.
The University of Washington gratefully acknowledges the Arcora Foundation (which is funded by Delta Dental of Washington) for its generous educational grant in support of this program.

This course is designed for dentists, but team members are welcome to attend.

With the baby boom generation reaching 65 years and beyond, this is the first generation of Americans to reach older adulthood with an almost intact natural dentition. While keeping our teeth as we age is a positive trend, increasing lifespans can also result in the onset of chronic conditions, long-term medication usage, and oral diseases that can create complex dental treatment needs and questions on the part of dental professionals on how to care for this population.

Most dentists today received very little formal training in caring for the unique needs of older patients. Arcora Foundation engaged a team of national experts in serving older adults, led by Dr. Linda Niessen, DMD, MPH, to develop a course that discusses the importance of treating the oral health needs of independently-living older adults in your office. This course is targeted to general dentists to expand their expertise in delivering optimal dental care to this diverse, and growing, senior population who needs care. The course will include patient cases and discussion to assess treatment options based on the patient’s goals, ability to pay, health status, etc. The course is designed to build confidence in treating older patients, understand patient care options, and increase access to dental care for older adults.

**INSTRUCTORS**

O. Ross Beirne, DMD, PhD; Bea Gandara, DDS, MSD; Susanne Kölare Jeffrey, DDS, PhD; Kurt Labberton, DDS; and Rod Wentworth, DDS

**LOCATION**

**INSTRUCTORS**

Richard G. Stevenson, DDS

**LOCATION**

Emerald Queen Conference Center
5580 Pacific Highway E
Fife, WA 98424

**TIMES**

Registration and Continental Breakfast: 8:00am – 8:30am
Course: 8:30am – 4:30pm

**TUITION** price includes lunch

Before October 25, 2019 (after, $25 more)
$255/Dentist
$155/Staff or Retired member dentist

**CREDITS**

7 hours

**Topics will include:**

- Caries management – what to leave behind
- Pulp capping and managing pulp exposures
- Dental adhesion approaches to enhance restoration longevity
- Innovations in composite materials
- Class II composite restoration techniques
- Understanding the latest ceramic materials
- Preparation designs for e.max and Zirconia
- Veneer preparation variations
- Impression materials and techniques
- Cements – what to use where and how
- Preventing restoration fractures using a 5-step system

**Course Objectives - As a result of attending this course, you will learn:**

- How to manage the indirect and direct pulp exposure
- The different adhesive systems available and how to employ them to reduce post-operative sensitivity
- Which composites to use in different situations
- The indications for the different ceramic materials and when bonding is essential vs cementation
- How to manage soft tissue to facilitate better scans or traditional impressions
- How to minimize the risk of restoration fractures and chipping using a 5-step check
UPCOMING COURSES

FRIDAY, FEBRUARY 7, 2020
Infection Control and OSHA Update & Vaccine Recommendations: Science, Success and Myths
John Molinari, PhD

SATURDAY, FEBRUARY 8, 2020
Oral Radiology Primer/Update
Peggy Lee, BDS, MSD, PhD
Lecture and Workshop, will take place on the UW Campus

FRIDAY, FEBRUARY 28, 2020
The Oral Cavity Under Acid Attack and Treatment Planning
Marc Geissberger, DDS
This course is offered in partnership with the Snohomish County Dental Society, and will take place in Lynnwood, WA

SATURDAY, MARCH 21, 2020
Ergonomics: Neck, Back & Beyond and Fitness 101 for Dental Professionals – lecture and workshop
Bethany Valachi, PT, DPT, MS, CEAS
This course is offered in partnership with the Washington Academy of General Dentistry and will take place on the UW Campus

FRIDAY, MARCH 27, 2020
Ernest M. Jones Memorial Lecture
Details coming

SATURDAY, APRIL 18, 2020
Topic and speaker details coming
This course is offered in partnership with Oregon Health Sciences University and will take place at the Great Wolf Lodge in Centralia, WA.

FRIDAY, APRIL 24, 2020
LAW/LEWIS LECTURE ON PEDIATRIC DENTISTRY
Pediatric Concerns in Sedation and Emergencies
James Tom, DDS, MS
This course will take place at the Mountaineers Club in Seattle

FRIDAY AND SATURDAY, MAY 1 AND 2, 2020
Oral Surgery for the General Dentist—Hands On Workshop
Karl Koerner, DDS
This course is offered in partnership with the Washington Academy of General Dentistry and will take place in Seatac, WA.

FRIDAY, MAY 1, 2020
Current Topics in Oral Pathology
Dolphine Oda, BDS, MS
This course is offered in partnership with the University of British Columbia and will take place in Bellingham, WA.

FRIDAY, MAY 8, 2020
Neurotoxin Therapies for the Dental Professional
Timothy Hess, DDS
This course is offered in partnership with the Washington Academy of General Dentistry and will take place in Seatac, WA.

FRIDAY, JUNE 12, 2020
Graduate Prosthodontic Symposium
This course will take place at the Mountaineers Club in Seattle.

FRIDAY AND SATURDAY, AUGUST 21 AND 22, 2020
Atraumatic Extractions for the General Practitioner — hands-on workshop
Steven Rasner, DMD, MAGD
This course is offered in partnership with the Washington Academy of General Dentistry and will take place in Seatac, WA.

ONLINE Courses The ultimate in convenient CDE credit!
Head to www.uwcde.com for more information
CANCELLATION AND REFUND POLICIES

LECTURE COURSES
You must inform the CDE office if you cancel a course by the day before the course. If you do not cancel by the day before the course, you will be considered a “No Show”.

For cancellations:
You have two options if you cancel. You can receive a full refund minus a $40 processing fee, plus a $10 fee for each “additional applicant”, or the full amount can be transferred to another CDE course (or courses depending on the amount of the funds transferred) within the same CDE calendar year (September - June). Tuition credit from previous years can not be applied to courses in the current year. The funds can only be transferred once.

For No Shows:
No refund or funds transfer is available.

PARTICIPATION COURSES
Refunds for CDE participation courses must be requested at least fourteen days prior to the first meeting of a course. All participation courses have a $100 non-refundable deposit. The deposit is necessary to cover materials that are incurred which are non-refundable to our office. If a cancellation is made less than fourteen days before a course, no monetary refund will be given, and the money can not be transferred to another course. If a participation course is cancelled by CDE, all participation courses within the same CDE calendar year (September - June) are subject to a $40 processing fee, plus a $10 fee for each “additional applicant”, or the full amount can be transferred towards another CDE course within the same CDE calendar year (September - June).

PARTNERSHIP PROGRAMS
Cancellation policies of programs presented in partnership with other organizations may vary. Please see specific course information for details.
