

# GoDental<sup>SM</sup>

ADEA is proud to announce the launch of [GoDental.org](http://GoDental.org), a new interactive multimedia web resource to enhance the dental education experience. [GoDental.org](http://GoDental.org) provides advice to high school and pre-dental students interested in pursuing dental careers, introduces them to the world of dentistry through mentorship, and offers direction for navigating the application process.

[GoDental.org](http://GoDental.org) fosters career and social networking through resources like:

## DentNetworks<sup>SM</sup>

A new interactive forum where students can engage with peers, dental students, and others about applying to dental school, what it means to be a dental student, and the value of a promising dental career.

## Blogistry<sup>SM</sup>

Monthly blog posts from dental professionals and students. In Blogistry, we blog on everything, and we mean everything: applying to dental school, financing a dental education, the latest news affecting dentistry, and the perspectives of current students.

## DenTube<sup>SM</sup>

A new online channel with videos on current events, what dental school is like, and tips for a successful application to dental school.

Download a printable [GoDental Flyer](#), or forward this email to your students. Both you and your students can now sign up as GoDental members. (Note that ADEA membership includes membership in GoDental; your ADEA member login is also your GoDental login.) Membership allows you to participate in DentNetworks and enjoy valuable commentary in Blogistry.
